

individual, exciting & creative

stunning looks and advanced technology means the Coffee Celebration bean-to-cup system is at the top of its class

This technically perfect and aesthetically pleasing coffee machine leaves nothing to be desired. The high standards of manufacture and design are clear to see. The key to its success lies in the precision Swiss engineering and patented new chilled milk system technology which makes serving coffee a celebration of quality and taste.

individual, exciting & creative

coffee perfection

The Celebration is the ultimate bean-to-cup coffee system. Born out of enthusiasm for really great coffee, the Celebration embodies quality, style and practicality. This versatile machine can have up to 4 bean hoppers (angled for ease of filling and for better bean flow) plus a separate decaf chute which uses pre-ground decaffeinated coffee. The double dispense head is height adjustable to allow tall glasses to be used while a separate hot water dispense means tea and other hot drinks can be served.

CELEBRATION 'C'

care-free milk system

All coffee drinks containing milk, such as cappuccino, latte and macchiato, are made automatically at the touch of a button. Milk is stored in one of three ways, depending on your requirements - next to the machine in a separate refrigerator, inside the machine in an integral chilled milk unit (model BCL) or in an undercounter unit. The patented milk system ensures milk is chilled and kept fresh and hygienic right up to the moment it is vapour-heated and frothed at the point of dispense.

CELEBRATION 'BC'

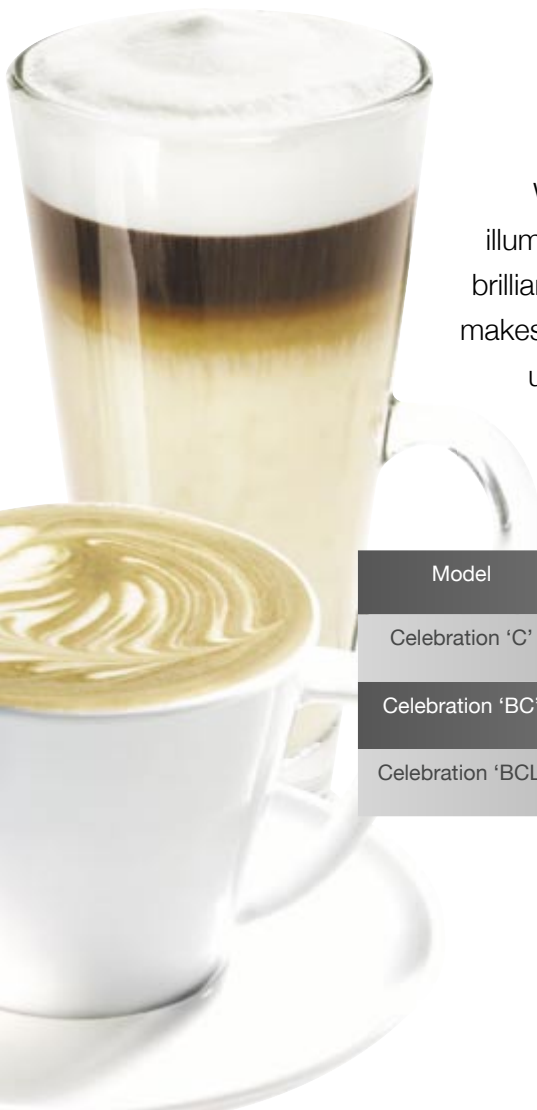

a touch of class

When you select your drink by touching the illuminated screen, you really get a sense of the brilliant Swiss technology and engineering which makes this extraordinary machine. With many set up options, from the slimline Celebration 'C'

'BCL' WITH CUP WARMER & 'C'

to a complete customised bank of systems set-up for busy retail situations, the Celebration is the perfect bean-to-cup coffee solution for many environments.

Model	H/W/D mm	Set-Up (grinders/steam/water)	Boilers (coffee/water/steam)	Output (125ml coffees per hr)	Power
